Added value for our customers.

More than just a carrier – our extensive knowledge of location logistics is based on many years of expertise.

On customers' sites

- + Shunting activities on factory premises
- + Loading activities in refineries

Loading and unloading of freight wagons and containers

- + Adapted to all types of goods
- + Multimodal transport

Handling, storage and refining

- + Central warehouse on-site
- + Product-specific know-how

CUSTOMER-SPECIFIC PLANT TRANSPORT

A photograph of a RheinCargo train at an industrial facility. The train, consisting of a grey locomotive and several open-top freight cars, is moving along tracks that curve through the scene. The locomotive features the RheinCargo logo and the text 'DE 502' and 'RheinCargo'. The freight cars are filled with dark material, likely coal. In the background, there is a large industrial plant with various structures, pipes, and smokestacks. The sky is overcast. A semi-transparent white box with blue text is overlaid on the upper left portion of the image.

STRENGTHENING CONNECTIONS WITH CUSTOMERS: EVERY DAY IN PLANT TRANSPORT.

51°31'01.5"N 6°58'09.5"E
PLANT TRANSPORT, BOTTRUP

Plant transport as a factor of production.

Plant and industrial transport as a whole: here, the entire infrastructure is constructed or adapted and constantly maintained.

Rail networks tailored to customer requirements

- + Whether refineries, steelworks or fertiliser manufacturers ...

Seamless process chains

- + Transport and shunting
- + Loading and unloading
- + Intelligent control

Efficient shift work

- + Trained staff
- + Round-the-clock service
- + Smooth processes

HARBOUR MASTER

A rail infrastructure on large factory premises can only work as a whole. Thanks to its wide diversification, RheinCargo is perfectly positioned to achieve this.

- + **Shunting activities**

- Coordination and execution on factory premises

- + **Tank wagon loading**

- Planning and execution

- + **Rail transport to transfer station**

- Organisation and implementation of rail associations

Case study: Bottrop coking plant.

In Bottrop, a RheinCargo joint venture is the backbone of the coking business for the world's largest steel company.

The plant railway in figures

- + 30 km track, 80 switches, 1 signal box, 10 bridges
- + Engine shed with social cabins and offices
- + System with overhead contact line
- + 15 kV overvoltage

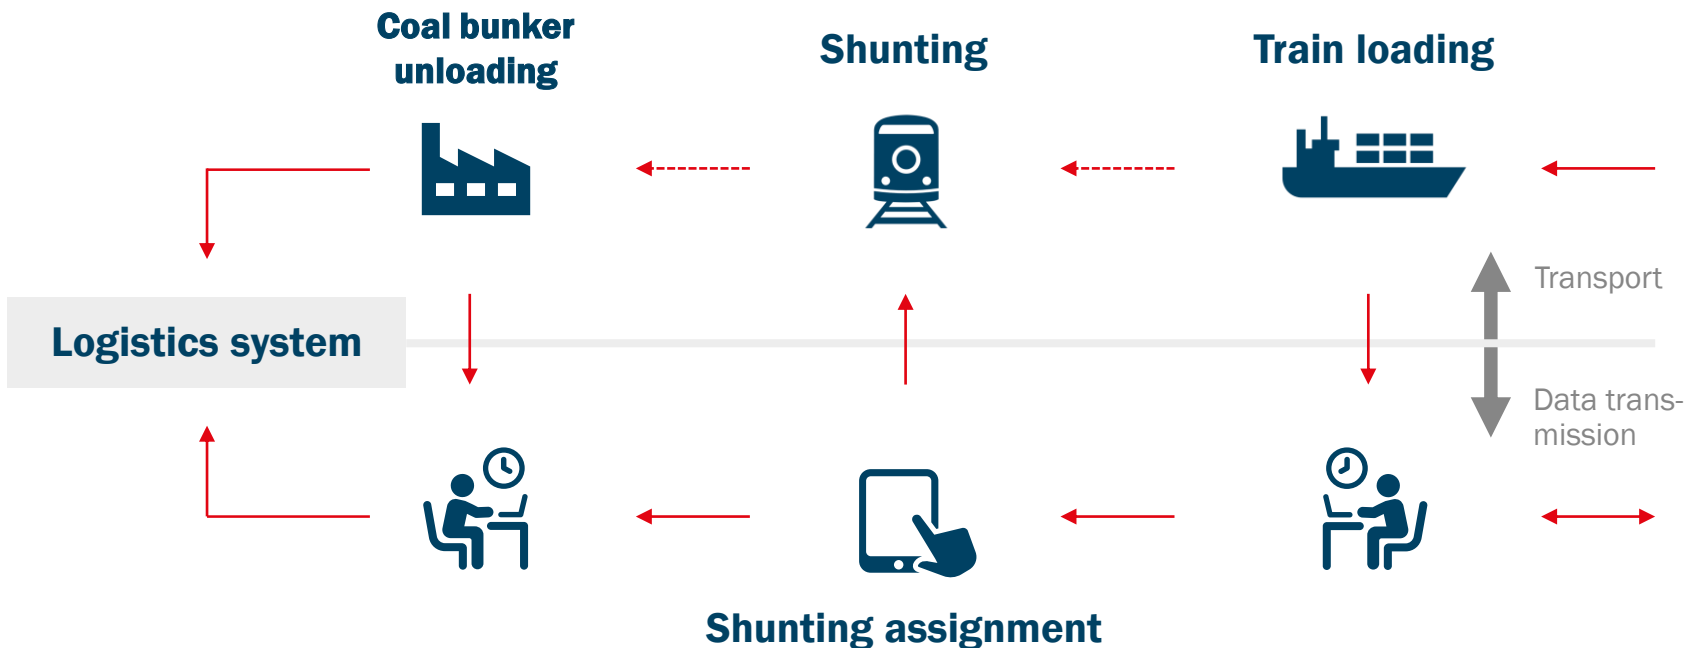

RheinCargo concept

- + 4 DE 18 locomotives, 1 G700
- + 200 goods wagons (Fal/EA)
- + Controller, harbour master, switchyard engineer
- + 3 shift operation 365 days/24 hours

Case study: Bottrop coking plant.
